SECTION II. INTRODUCTION

Method of Instruction: Practical Exercise (Hands-On/Written)
Mode of Delivery: Resident Instruction
Instr Type (I:S Ratio): Military - NON-ICH (1:15) (Drill Sergeant)
Time of Instruction: 5 mins

Motivator

One of the facts of Army life is drill. Soldiers are drilled in marching, handling weapons, and firing their weapons. The purpose of drill was to assure the Soldier would be ready for battle and know what to do in any given situation. When drilling with weapons, a list of procedures was followed step-by-step. Each of these procedures was critical to the successful loading and firing of the weapon. The procedures were accompanied by commands during drill. During an actual battle situation, the commands would not have been given, but the procedures still needed to be followed.

Terminal Learning Objective

NOTE. Inform the students of the following Terminal Learning Objective requirements.

At the completion of this lesson, you [the student] will:

Action:	Execute individual drill with Weapons
Conditions:	In an area suitable for performing manual of arms movements
Standards:	Correctly execute the following individual drill movements with a weapon in accordance with TC 3-21.5. a. Order arms b. Rifle rest positions c. Port arms d. Present arms e. Inspection arms f. Right shoulder arms g. Left shoulder arms h. Changing positions i. Sling arms j. Salute at sling arms k. Port arms from sling arms l. Inspection arms from sling arms
Learning Domain - Level:	Psychomotor - Precision
No JPME Learning Areas Supported:	None

Safety Requirements

Safety must be paramount in the complex outdoor environment. During the training process, commanders will utilize the 5-step composite risk management process to determine the safest and most complete method to train. Every precaution will be taken while replicating realistic battlefield conditions.

Safety is everyones responsibility to recognize, mitigate and report hazardous conditions.

Instructor note: The instructor will brief the unit/site SOP and composite risk management worksheet for all potential contingencies encountered during that training period/event i.e. severe weather, fire, evacuation and rally points etc.

Risk Assessment Level

Low - Heat/Cold Weather Injuries

Assessment: Ensure to check local weather reports with range control prior to executing training. Drill Sergeants must ensure all required clothing and equipment is present

Controls: Drill Sergeants will monitor Trainees to ensure adequate hydration and nutrition. Drill Sergeants will ensure Trainees are wearing the appropriate clothing and protective gear for the local weather.

Leader Actions: Ensure DD Form 2977 is updated with the appropriate controls. Make sure all Cadre are aware of controls prior to execution of training so they can take appropriate action.

Low - Interaction with the local wildlife

Assessment: Check local listing of wildlife

Controls: Ensure Soldiers get a detailed safety briefing prior to the execution of training to include what potentially hazardous animals and insects could be in the training area.

Leader Actions: Ensure DD Form 2977 is updated with the appropriate controls. Make sure all Cadre are aware of controls prior to execution of training so they can take appropriate action.

Low - Inclement Weather

Assessment: Check local forecasts with the Range Control

Controls: Brief Soldiers on what course of action to take for specific weather conditions (lightning, tornadoes, ect.)

Leader Actions: Ensure DD Form 2977 is updated with the appropriate controls. Make sure all Cadre are aware of controls prior to execution of training so they can take appropriate action.

Medium - Dehydration

Assessment: Check water levels in the unit's hydration system prior to execution of training. Make sure Soldiers have their water filled before and during training.

Controls: Make sure All Cadre and Trainees have received the most up to date Heat/Cold weather training available. All should be able to recognize symptoms of dehydration.

Leader Actions: Ensure DD Form 2977 is updated with the appropriate controls. Make sure all Cadre are aware of controls prior to execution of training so they can take appropriate action.

Environmental Considerations

NOTE: Instructor should conduct a risk assessment to include environmental considerations IAW the current environmental considerations publication, and ensure students are briefed on hazards and control measures.

NOTE: Commanders will review FM 3-34.5/MCRP 4-11B, Environmental Considerations, and ensure students are briefed on hazards and control measures by the primary instructor.

a. Based on its commitment to environmental protection, the Army will conduct its operations in ways that minimize environmental impacts. The Army will—

(1) Comply with all environmental laws and regulations and treaties. This includes federal, state, local, and Host Nation laws, some of which are outlined in TC 3-34.5/MCRP 4-11B, Appendix A.

(2) Prevent pollution at the source by reducing, reusing, and recycling material that causes pollution.

(3) Conserve and preserve natural and cultural resources so that they will be available for present and future generations.

b. Units and installations will prepare an environmental risk assessment IAW 5-19, Appendix A. The checklist should supplement local and state environmental regulations applicable to your area. Units will also refer to FM 3-34.5/MCRP 4-11B Appendix D (Environmentally Related Risk Assessment) for further guidance.

The Drill and Ceremonies movements taught today will serve as a foundation for the remaining drill and ceremony

Instructional Lead-in

lessons you will receive in Initial Entry Training and throughout your military career.

SECTION III. PRESENTATION

TLO - LSA 1. Learning Step / Activity TLO - LSA 1. Basic procedures that apply to the M4 series carbine

Method of Instruction: Practical Exercise (Hands-On/Written)

Mode of Delivery: Resident Instruction

Instr Type (I:S Ratio): Military - NON-ICH (1:20)(Drill Sergeant)

Time of Instruction: 18 mins

Media Type: None

Other Media: Unassigned

Security Classification: This course/lesson will present information that has a Security Classification of: U - Unclassified.

a. Basic Procedures: The following are basic procedures that apply to the M4-Series Carbine:

-At the *Halt*, all movements are initiated from *Order Arms* or *Sling Arms*, which are the *Positions of Attention* with the carbine.

-All precision movements are executed in quick-time cadence.

-For drill purposes, the magazine is not carried in the carbine. When performing duty requiring the use of the magazine, the carbine is carried at *Sling Arms*.

-The command **Port, ARMS** must be give before the command for *Double Time*.

-*Facings*, alignments, and short-distance marching movements are executed from *Order Arms* or *Sling Arms*. When the movement has been completed, automatically return the carbine to *Order Arms*.

-Facing movements are executed from *Order Arms* or *Sling Arms*. When *Facing* is necessary to establish the direction of march, the *Facing* movement is executed before the command for the manual of arms. After a marching movement has been completed, **Order, ARMS** or **Sling, ARMS** is commander before the command for the facing movement.

-**Ready, Port, ARMS** must be commanded following Inspection Arms and before any other movements can be commanded.

-*Port Arms* is the key position assumed in most manual of arms movements from one position to another except *Right Shoulder Arms* from *Order Arms* and *Order Arms* from *Right Shoulder Arms*.

-Manual of arms movements are a combination of the *Position of Attention* and the procedures for the the prescribed movement. Most manual of arms movements are executed with the head, eyes, and body as in the *Position of Attention*.

-*Sling Arms* is the appropriate position assumed to carry the carbine while marching in most situations. *Port Arms* is only used when slings are unavailable or unless specifically required by local conditions.

Order Arms is the Position of Attention with a carbine or rifle. To execute Order Arms, use the following procedures:

(1) **Order Arms:** Assume *Order Arms* on the command **FALL IN** or from *Parade Rest* on the command of execution **ATTENTION**. At *Order Arms*, maintain the *Position of Attention*. Grasp the weapon by cupping the butt of the carbine with the right hand, fingers joined with the thumb on the toe of the butt. Hold the carbine vertical with the magazine well to the the front with the trailing edge of the right hand on line with the seam of the trousers.

b. **Rest Positions:** The Rest Positions are Commanded and executed the same as in individual drill with the following additions:

(1). On the command of execution **REST** of **Parade REST**, execute the movement as in individual drill without moving the right hand or the carbine.

(2). Execute *Stand at Ease* in the same manner as *Parade Rest* except turn the head and eyes toward the person in charge of the formation.

(3). On the command **AT EASE** or **REST**, keep the carbine in place as in *Parade Rest*.

a. **Sing Arms:** These basic procedures apply to all movements while at Sling Arms:

- Remain at *Sling Arms* during all rest movements.
- All individual and unit drill movements can be executed at *Sling Arms* except *Double Time, Stack Arms* and *Fix and Unfix Bayonets*, which are executed from *Order Arms*.
- When in formations at *Sling Arms*, execute the *Hand Salute* on the command **Present, ARMS**.
- Platoon leaders and Platoon Sergeants carry their carbines at *Sling Arms* during all drills and ceremonies, and from this position they execute *Present Arms* only. They do not execute *Unsling Arms*. This also applies to Squad Leaders when squads drill as separate units.
- When all members of a unit are carrying their carbines at *Sling Arms*, the Platoon Leaders and Platoon Sergeants execute *Present Arms* only. They do not execute *Unsling Arms*.

To execute Sling Arms use the following procedures:

1. To execute *Sling Arms* from *Order Arms* with the sling(s) loose, the command for *Sling Arms* is **Sling, ARMS**. On the command of execution **ARMS**, grasp the sling near the upper sling swivel with the left hand, and release the right hand. Place the right hand and arm between the sling and carbine and place the sling over the right shoulder. Re-grasp the sling with the right hand so that the wrist is straight, the right

forearm is horizontal, the elbow is tight against the side, and the carbine is vertical. Release the grasp of the left hand and move it sharply to the left side as in the *Position of Attention*.

2. To return the carbine to *Order Arms* with the sling tight, the command is **Adjust, SLINGS**. On the command of execution **SLINGS**, remove the carbine from the shoulder. Then, grasp the rifle barrel with the right hand and raise it vertically. With the left hand, place the butt of the carbine on the right hip and cradle it in the crook of the right arm. Use both hands to tighten the sling on the ejection port side. Grasp the handguards just above the slip ring with the left hand and move the weapon to the *Order Arms* position. At the same time, move the right hand, release the grasp of the left hand and return it sharply to the side as in the *Position of Attention* and return to *Order Arms*.

3. From *Order Arms* with sling(s) tight, the command is **Sling, ARMS**. On the command of execution **ARMS**, reach across the body with the left hand and grasp the handguards just above the slip ring and, with the right hand, place the butt on the right hip, cradle the carbine in the crook of the right arms, and use both hands to adjust the sling. Grasp the sling with the left hand near the upper sling swivel and execute *Sling Arms* (as previously described).

4. If an element is at *Order Arms* with the sling loose and the commander wants the sling to be tightened, he commands **Adjust, SLINGS**. On the command of execution **SLINGS**, tighten the sling and guide the carbine to *order arms* (as previously described).

NOTE: Unless otherwise specified, armed elements of a formation fall-in at *Order Arms* with slings loose.

5. To return the carbine to *Order Arms* with the sling loose, the command is **Unslung, ARMS**. On the command of execution **ARMS**, reach across the body with the left hand and grasp the sling at the right shoulder. Release the right hand grasp and remove the carbine from the shoulder. Grasp the barrel with the right hand, release the left hand and regrasp the handguards just above the slip ring, release the grasp of the right hand, and move the carbine to the *Order Arms* position (as previously described). Move the carbine to the position of *Order Arms* and regrasp the butt with the right hand. After grasping the butt with the right hand, release the grasp of the left hand and return it sharply to the side as in the *Position of Attention* and return to *Order Arms*.
